

## WHAT CAN YOU EXPECT ON THIS PROGRAMME?

360° interaction

Goggles required

Real-time feedback

Age: 11-17

We are fusing real-time collaboration with interactive digital learning, challenging English students to work together in a range of new ways. Students will explore different locations and scenarios, interact with items in the VR world, and work together to respond to challenges and solve problems as a team. All this, and so much more, while learning and improving English.

*Why Choose EC VR Experience?*

### **Complete Immersion**

With complete sensory, actional and narrative immersion, students participate and respond to tasks inside a VR lesson. By actively living a lesson, students feel more involved and, as a result, learn more, both linguistically and socially.

### **Social Interaction**

Virtual reality is the next best thing to physically being in a classroom. Students use the hardware to move around spaces, do classwork, chat about tasks together, congratulate and encourage each other - they can even high five - just as they would in person.

### **Effective Learning**

We apply decades of language teaching experience to the virtual environment. VR can give students a sense of reassurance and confidence as they participate in scenarios that may otherwise be beyond their reach. By removing external distractions, students can focus exclusively on the lesson.

### **Develop Future Skills**

With immersive technology, students literally work together to solve problems, developing key 21st century skills such as creativity and critical thinking, as well as social and emotional awareness which can increase motivation and decrease anxiety.

EC VR Experience EC students will move between their VR English classroom and a range of engaging, interactive, real-life scenarios and situations in the VR world, transforming the way English is taught and learned.

#### *Course Information*
